Back-End: Node.js, Express, MongoDB, Mongoose, MySQL, PostgreSQL, Sequelize, Artillery
Tools, Techniques, and Methodologies: Git, Github, Jest, Trello, Agile Development Practices

Software Engineering Projects
ES Apparel
Backend Engineer || Node.js, PostgreSQL, Sequelize, AWS-EC2, Artillery, Faker, New Relic
Designed and implemented backend microservice architecture for E-commerce app || Inherited legacy code, migrated into PostgreSQL || Generated 10million records for testing || Built out fully functional API services to allow integration of recently constructed FE services || Deployed to an AWS-EC2 instance || Stress-tested with artillery using realistic user-scenario simulation and behavior.

Front-end Engineer || React, SCSS, MaterialUI
Re-built the client-facing portion of an outdated E-commerce application using React || Constructed a 'Ratings and Reviews' microservice that rendered important user-provided information about consumer products in a concise, readable, and informative manner || Worked as part of a small team using Trello and feature-branch workflow to produce deliverables, design and create features based on user-stories, and operate under deadlines.

MovieApp!
Front-end Engineer || Vue, Vuex, Vuetify
Designed and implemented a single-page movie application allowing users to browse films by category, search for films, and add and remove films from a favorites list. Favorites are persisted between sessions via the local storage API and a Vuex subscription.

Choss-Finder
Front-end Engineer || React Native, Expo
Proof-of-concept React Native application providing users with a curated list of top-rated rock climbs based upon their current location || Provides route-detail, location and photos

Selected Professional Experience
Acquolina, Aspen, CO
Bartender || Spring/Summer/Fall 2017 - 2018
Provided outstanding customer service to a high-end clientele || mastered 30+ house cocktails while working with the largest liquor selection in Colorado || managed multiple tasks simultaneously while maintaining a clean and orderly work environment || consistently remained calm, professional, and personable while working in a high-volume, high-pressure establishment.

Education
Galvanize, Boulder, CO
Hack Reactor Software Engineering Immersive || March 2020
Portland State University, Portland, OR
Bachelor of Science – Psychology - Cum Laude || December 2015
